BUTTON SOFA by FRONT SWEDESE

Awarded as 'Furniture of the year at Stockholm Furniture Fair', the Button Sofa is acclaimed for its unique use of accessories to adapt to its user's own personality, with wooden buttons enabling users to attach accessories and give the sofa additional functionality. The wood and leather details indicative of the piece's Swedish heritage make this piece one which is suited to both commercial environments and the modern home.

Subtle wooden details are present on both sides of the sofa, allowing all aspects of the piece to be customised. FRONT has created this feature with the intention that the couch would be placed centrally in a space, allowing all of its detailing to be fully displayed. This piece embodies Cube+Circle's ethos of sustainable design through incorporation of minimal, functional and natural materials that last beyond just aesthetic forms.
