Moodlum Dean Norton

Moodlum is a timeless furniture collection composed of a leaning shelf, coffee table, side table and mirrors. Each piece has been carefully designed in rounded form definition to set the mood in any environment, a piece of furniture but also a piece of art that merges with and elevates any personal style or interior space.

Made in Melbourne, all five pieces share the same design principles which include a 50mm radius and 70mm thickness throughout, with no visible fixings. The coffee & side table tops double up as wall mirrors, giving the collection design consistency and allowing pieces to be grouped together within the same setting. The finishes are subtle and refined, available in matt white and black, with a metallic smoke grey mirror highlight.

Custom colours available on request.
