## TECHNICAL SPECIFICATIONS

Fin Pendant

Tim Webber Design is an award-winning New Zealand-based furniture and lighting studio with a clean, simple and carefully considered aesthetic. The diverse range offers innovative and functional designs showcasing the use of honest, mixed materials and subtle details.

Pieces lend themselves to both residential and commercial spaces, which is reflected in the options available for finishes and materials.

With an almost completely New Zealand-made range, supporting local manufacturing and craftspeople is at the heart of the Tim Webber Design operation and ensures each product is crafted to last.

The Fin Pendant is designed as a sculptural lighting product that expresses a stark contrast in materials between the opaque, warm acrylic diffuser, and the bold, solid metal 'fin'.

Duffel Stool & Ottoman

The Duffel series is inspired by drawstring duffel bags and has appropriated some of their various features that express quality and functionality.

Shift Table

The Shift Table features leg frames constructed from 5mm bent steel and oak dowel. These details give it a slim and elegant profile and make it a point of focus in your dining or office space.

Layer Sofa

The Layer Sofa has comfort and elegance at its heart. It has been designed with a slim double layered frame, providing a 'light' aesthetic yet with all the strength and rigidity required. Stunning from all angles.
