

VOLKER HAUG Studio

**DENFAIR 2018
Press Release
06/06/2018**

From the 14th to the 16th of June, Volker Haug Studio will be showing their recent lighting pieces at DENFAIR design show in Melbourne.

Proud of winning Best Product in 2016 for their U Chain series and Best Small Stand in 2017, Volker Haug Studio are excited to once again be participating in this years exhibition.

Founder Volker Haug says “DENFAIR offers an opportunity to connect face-to-face with the Interior Designers and Architects who support Australian made design”. For this special occasion, the Studio’s new Oddments pendant and Longton wall fixture will be introduced to the Australian community.

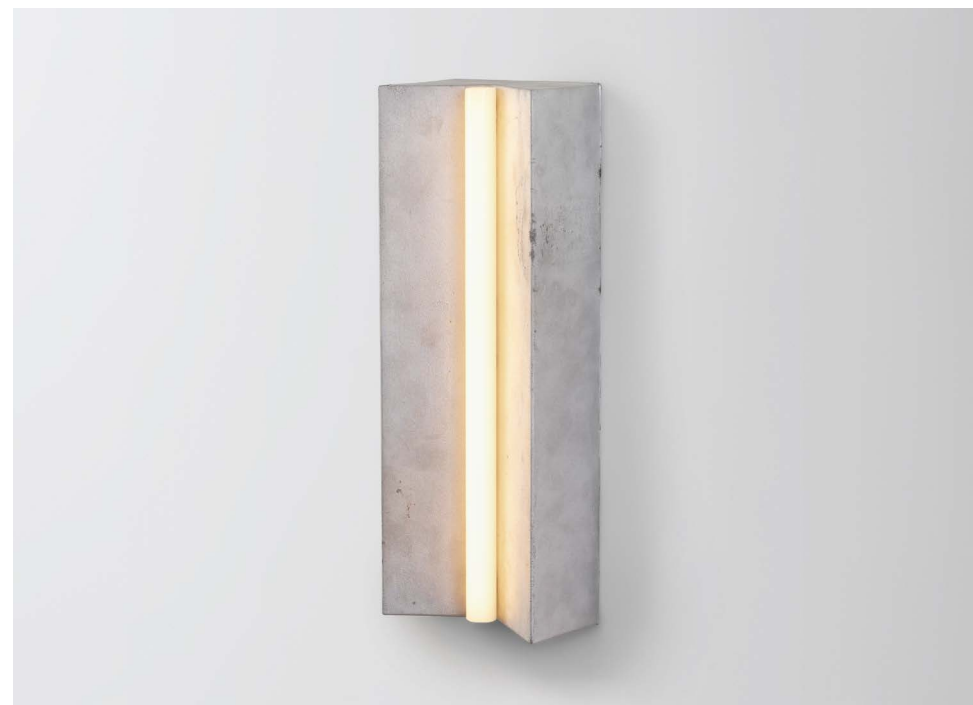

Oddments is an expandable system of arcs mapping the durational imprint of their orbit. Arcs are available in a range of sizes that can outwardly expand across the horizontal plane, ascend vertically over a void or interact playfully. Segments can be hung singularly or combined to create an open or closed system that is unconfined by scale or surrounds. Made from blown glass spheres and brass hand finished to specification, Oddments offers a solution to the architectural problem of ceiling suspensions.

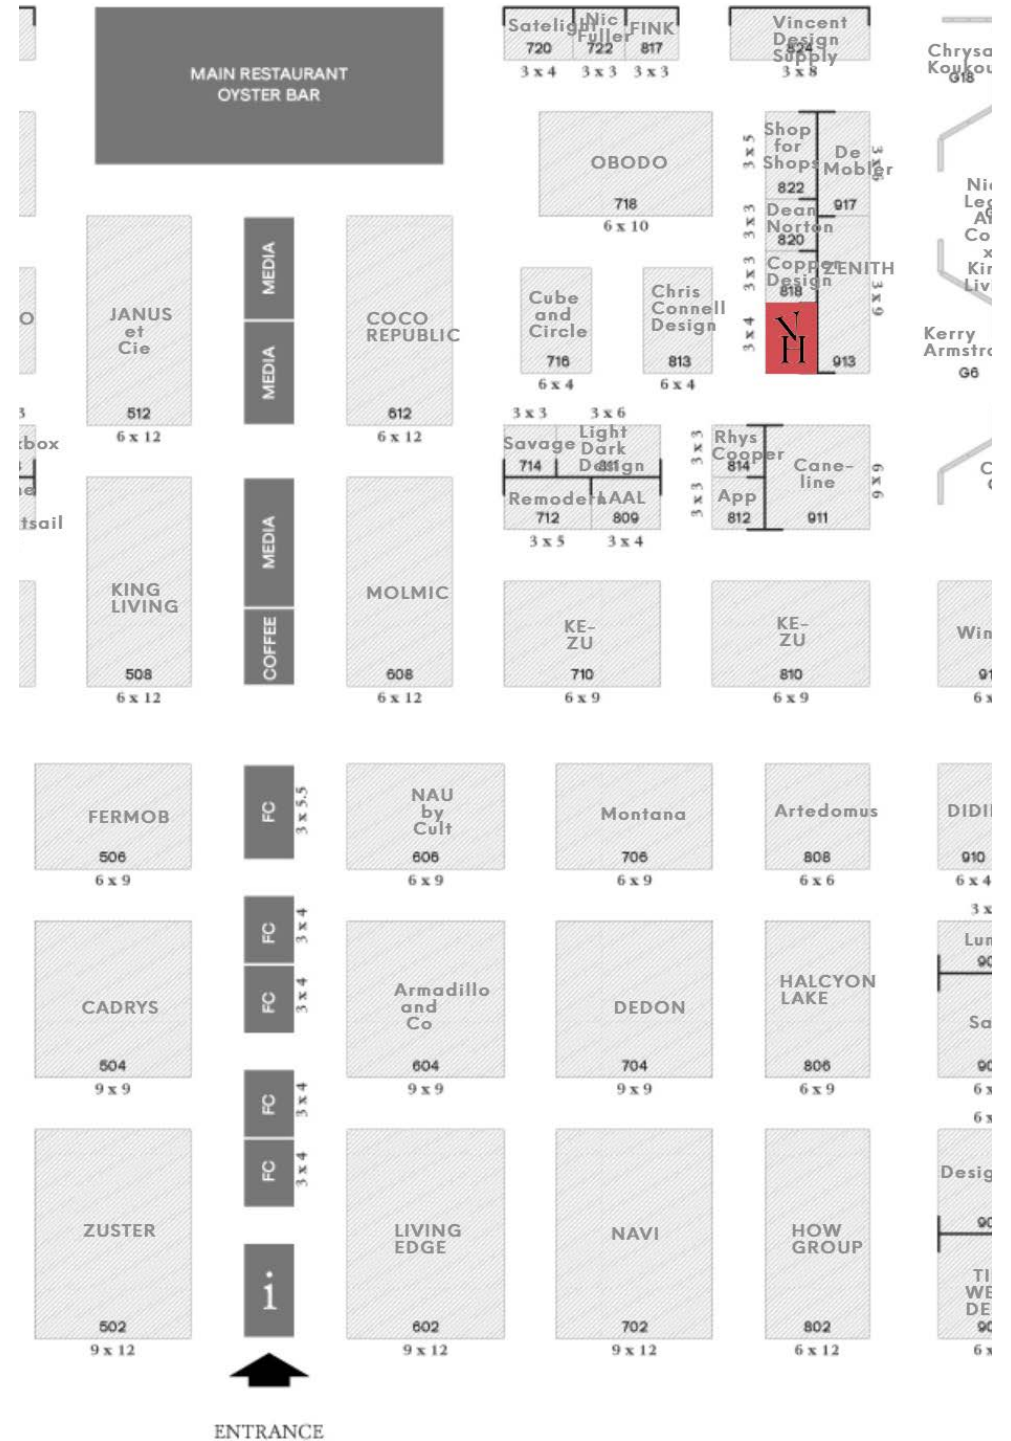

Longton

The newest edition to the Anton family, Longton explores the structural weight of light through cast materials. A crisp rectangular fixture punctuated by a linear lamp that holds light and reflects its surrounds on three planes. Longton is available in raw aluminium and polished gunmetal.

Stand Location

Volker Haug Studio will be located at Stand Number 816. The Studio encourages all design enthusiasts to visit and introduce themselves to the Team behind the objects.
